User manual

AXIS Camera Station Cloud Storage

Store recordings in the cloud

Store recordings in the cloud

AXIS Camera Station Cloud Storage offers a way to store your recordings in the cloud. To configure cloud storage:

1. Enable the connected services on your devices. See *Enable connected services on your devices in the AXIS Camera Station Edge user manual* for more information
2. Activate cloud storage for the organization. See for more information.
3. Turn on cloud storage for your individual cameras. See for more information.

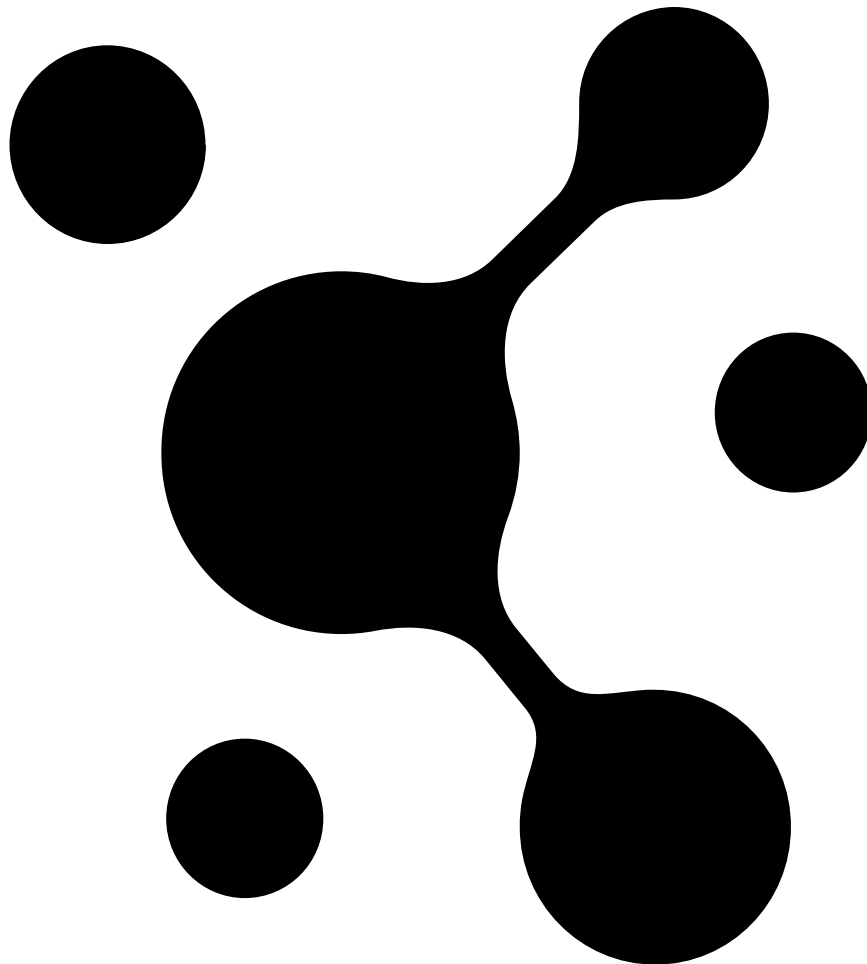

For AXIS Camera Station Cloud Storage to connect to required services, you need to allow some traffic in the firewall. See for more information.

AXIS Camera Station Cloud Storage

Store recordings in the cloud

Activate cloud storage for an organization
