

AXIS Camera Station Cloud Storage

About the cloud storage

AXIS Camera Station Cloud Storage is an add-on service complementing **AXIS Camera Station Edge** and **AXIS Camera Station Pro** installations, offering the ability to safely store and manage your video recordings in the cloud.

Get started

Before you start, make sure you meet these requirements:

- You have AXIS Camera Station Edge or Pro set up on your system.
- Your AXIS Camera Station Pro server or devices in AXIS Camera Station Edge are registered to connected services.
- Your cameras run AXIS OS with firmware version 11.11.73 or later. Find out which products are compatible on our *Product compatibility page*.

Store recordings in the cloud

AXIS Camera Station Cloud Storage offers a way to store your recordings in the cloud. To configure cloud storage:

1. Enable the connected services on your devices.
 - AXIS Camera Station Edge: See *Enable connected services on your devices in the AXIS Camera Station Edge user manual* for more information.
 - AXIS Camera Station Pro: See *Configure connected services in the AXIS Camera Station Pro user manual* for more information.
2. Activate cloud storage for the organization. See for more information.
3. Turn on cloud storage for your individual cameras. See for more information.

Note

For AXIS Camera Station Cloud Storage to connect to required services, you need to allow some traffic in the firewall. See for more information.

Activate cloud storage for an organization

1. Open the My Systems menu

2. Open

Cloud storage.

3. Click **Activate** and follow the on-screen instructions.

Turn on cloud storage for your individual cameras

1. Open the My Systems menu

2. Open

Cloud storage.

3. Select the cameras that you want to turn on cloud storage for.
4. Click Turn on cloud storage.
5. Customize your storage setup. Our *license calculator* helps you determine the number of licenses required based on your retention and resolution needs.
6. Click Confirm.

Firewall configuration

For AXIS Camera Station Cloud Storage to connect to required services, you must allow the following URLs in the firewall:

- *.connect.axis.com
 - prod.keyserver.vms.connect.axis.com
 - prod.cloudstorage.vms.connect.axis.com
- *.wasabisys.com
 - *.s3.<region>.wasabisys.com

<region>	Description
ap-southeast-2	Australia
ca-central-1	Canada
eu-central-2	EU
eu-west-1	UK
us-east-1	US

Cloud storage settings

Storage setup	
Storage location	The storage location is the region where you store your recordings. Changing the storage location affects only future recordings and doesn't move your old recordings.
Retention time (days)	Currently the retention time is fixed at 30 days.
Recording resolution	Currently the resolution is fixed at 720p.
