AXIS Camera Station Mobile App

User manual

Introduction

> **Note**
>
> The user interface may differ depending on your application version, but the functionality is the same.

Through AXIS Camera Station mobile app, you can connect to your AXIS Camera Station server and access live view and recordings on your mobile device from anywhere. You can also export recordings and receive real-time notifications.

For current requirements, limitations, and latest features, go to:

- AXIS Camera Station mobile app for Android *release notes*
- AXIS Camera Station mobile app for iOS *release notes*

To see all videos about AXIS Camera Station mobile app, go to this *playlist.*

AXIS Camera Station Mobile App
